

Weeds of Alberta

Description: This course explores the identification, taxonomy, biology, and control of non-native plant species in Alberta, with an emphasis on the 95 noxious and prohibited noxious weeds listed under the Weed Control Act, as well as the powers and functions of the WCA. Including unregulated species, over 180 weedy species are covered. Differentiation from look-alike species is also addressed.

Target audience: rural property owners, gardeners, environmental stewardship groups, students, academics, vegetation managers, consultants.

Volume: roughly 15 hours of content.

Content	Slide Count	%
Module 1 - Introduction to Weeds	~40	11
Module 2 - Noxious Weeds & Look-Alikes	94	25
Module 3 - Prohibited Noxious Weeds & Look-Alikes	178	48
Module 4 - Unregulated Weeds & Weedy Native Plants	59	16
Total	371	100%
